Carla Luciana Vega

Full Stack Developer

Argentina - Buenos Aires
carlavega1323@gmail.com
+54 1161927022

A seasoned Full Stack Developer with a track record in crafting intuitive and functional applications. My strengths lie in both independent and collaborative work, coupled with a knack for problem-solving and designing user-friendly interfaces. I have spearheaded projects from inception to deployment, leveraging a diverse range of technologies and agile methodologies like Scrum. Additionally, I am proficient in English, certified at the C2 level.

PROFESSIONAL EXPERIENCE

Full Stack Developer
Company**: Edutech**   Nov. 23 - Feb. 24.

- Independently developed a comprehensive application that connects to the Moodle platform to consume relevant information and presents it intuitively to end-users. The application serves as an effective bridge between Moodle and users, facilitating access and visualization of critical educational data.

Technologies Used:
- Frontend: React, Redux.
- Backend: Node.js, Express.
- Data base: PostgresSQL, Sequelize

Achievements:
- Implemented the functionality to consume data from Moodle through the respective API
- Designed an intuitive and responsive user interface using React and Redux

The application has proven to be a valuable tool for users looking to access and visualize Moodle data efficiently. Positive feedback highlights its usability and contribution to the educational process.

Full Stack Developer Junior   March 23 - May 23.
Company: Aqui Estoy!

- Development of a scheduling application for internal management within the company, consisting of user management, agenda management, supervision panel, and 4 types of users.

My features in the app:
- Implementation of the application's messaging feature.
- Implementation of calendar logic both on the front-end and back-end, including scheduling
- Technologies used: Node.js, Express, SQL, Sequelize, JavaScript, React, Redux, Material UI, Figma.
- Methodology: Scrum.

Full Stack Developer
Company: Edutech
Duration: 03/24 - 05/24

I spearheaded the development of a user management application for Edutech, which facilitated the administration of credits for users. This comprehensive system not only managed user accounts but also efficiently handled credit allocation and tracking.

Key Contributions:
- Designed and implemented features for user authentication and credit management, ensuring secure and efficient operation.
- Integrated functionalities for credit allocation and tracking, providing users with transparent and accessible credit management tools.

Technologies Used: Node.js, Express, SQL, Sequelize, JavaScript, React, Redux, Material UI, Figma.
Methodology: Scrum.

This experience honed my skills in full-stack development and equipped me with the ability to tackle complex challenges in user management and credit administration.

Henry Assistant   May 23 - July 23.
Company: Henry Bootcamp.
Coordinating and leading a group of over 20 people who coordinate groups of students. Under this premise, my responsibilities include:
- Resolving issues within the group.
- Providing training to the group on "Soft Skills," "Assertive Communication," and "Leadership".
- Evaluating and selecting individuals to join the group.

PROJECTS:

SPA (Single Page Application)
Bootcamp: Henry
This is an application that consumes a video game API to display them in the form of cards with a search feature by their name, combined filters and sorting options. It also includes a form to create a video game that is displayed alongside the others and saved in a database.

In this project, I was fully responsible for both the Front-end and Back-end development of the application.

TECHNOLOGIES:

Programming Languages:
Javascript | Typescript

Frameworks and Libraries:
React | Redux | Zustand | Vite | Nodemailer | Cloudinary

Databases:
SQL | Sequelize | MongoDB | Mongoose

Tools:
Git | Github | Slack | Figma

 Agile:
Scrum
